Chapter 7

Customers and Sales Part II

Table of Contents

Lesson Objectives	3
Advanced Invoicing Options	3
Credit Memos vs. Refund Receipt	9
Customer Statements	15
Delayed Charge	17
Delayed Credit	22
Sub-Customers	24
Estimates & Quotes	24
Reimbursable Expenses	30

In this chapter, you'll learn how QuickBooks handles advanced features and transactions in the area of sales and customers. In addition to basic sales invoices, sales receipts there are advanced transactions to help you manage sales in QuickBooks

▶ Lesson Objectives

In this chapter, you'll learn how to:

- Use advanced options on sales transactions
- Credits and Refunds
- Customer Statements
- Delayed Charges & Delayed Credits
- Estimates
- Invoicing & Reimbursable Expenses

▶ Advanced Invoicing Options

There are several options available to you when creating sales invoices. They may be useful in different situations when creating sales invoices for your customers. To access these features, go to **Account and Settings**.

1. Click the **Gear** icon.
2. Click **Account and Settings**.
3. Click **Sales**.

The screenshot shows the 'Account and Settings' window with the 'Sales' tab selected. The 'Sales form content' section is active, allowing customization of invoice forms. The 'Preferred invoice terms' is set to 'Net 30', and the 'Preferred delivery method' is 'None'. The 'Shipping' option is turned off. Under 'Custom fields', the 'Event Rep' field is checked for both 'Internal' and 'Public' visibility. Other options like 'Custom transaction numbers', 'Service date', 'Discount', and 'Deposit' are all turned on. The 'Products and services' section at the bottom shows 'Show Product/Service column on sales forms' is on, 'Show SKU column' is off, and 'Turn on price rules' is a new feature. A 'Done' button is visible at the bottom right.

Section	Option	Value/Status
Customize	Customize look and feel	Button
Sales form content	Preferred invoice terms	Net 30
Sales form content	Preferred delivery method	None
Sales form content	Shipping	Off
Sales form content	Custom fields	On
Sales form content	Custom transaction numbers	On
Sales form content	Service date	Off
Sales form content	Discount	On
Sales form content	Deposit	On
Products and services	Show Product/Service column on sales forms	On
Products and services	Show SKU column	Off
Products and services	Turn on price rules	Off (NEW)

- **Preferred Invoice terms**—Determines the default terms to be added to customer invoices.
- **Preferred Delivery Method**—The delivery method default determines the way you'll deliver sales forms to newly-created customers.
- **Shipping**—Adds shipping fields (date, tracking number, destination, subtotal) to sales forms.
- **Custom fields**—Adds extra fields to sales forms. Select "**Internal**" to show the field in QuickBooks; select "**Public**" to show the field on customer forms.
- **Custom Transaction Numbers**—Lets you use your own numbering system. If left blank, invoice numbers are automatically assigned by QuickBooks.
- **Service Date**—Adds a **Service date** field if you need to track the date a service was performed separately from the invoice date.
- **Discount**—Adds a **Discount** field to invoices and other sales forms. In a related setting under Advanced → Chart of Accounts, you can assign what account to track the discount to.

Chart of accounts

Enable account numbers ?

Discount account ?

Markup income account ?

Billable expense income account ?

- **Deposit**—Adds a Deposit field to invoices so you can subtract a customer deposit from the total to calculate the balance due.

Now let's review some of these options in action on the sales invoice. You'll see several new options in the header of the invoice form. You see the following:

- Terms
- Shipping information
- Sales Rep and Territory (custom fields)
- Invoice Number

2						Subtotal: \$3,000.00
3						

Subtotal \$3,000.00

In the footer section of the invoice you can add a **Discount**. You can add a % discount or a flat rate discount. QuickBooks will calculate the amount and adds a line to the footer.

You can also receive a **Deposit** against this invoice. This acts as a payment against the invoice and reduces the amount owing by the amount of the deposit. Since your customer is giving you

a deposit, you must tell QuickBooks how you received the payment and what account you're depositing the funds to. These fields are activated after you enter the **Deposit** amount.

▶ Credit Memos vs. Refund Receipt

There are times where you'll be required to issue credit and refunds back to customers for a variety of reasons. These may include faulty products, overcharging, poor service, etc. There are two ways to handle this type of situation in QuickBooks.

1. **Credit memo**—Create a credit memo in QuickBooks if you want to issue a credit and apply the credit against an outstanding or future invoice. If you have created an invoice for the customer you typically issue a credit memo. The workflow will be the following:

Invoice → *Credit Memo* → *Apply Credit Memo*

2. **Refund Receipt**—Create a Refund Receipt to refund a customer for a payment they've made for products or services. If you have created a Sales Receipt for the customer you typically issue a Refund Receipt. The workflow will be the following:

Sales Receipt → *Refund Receipt* → *Print Cheque (optional)*

Credit Memo

You can give a credit memo to immediately post the transaction. Or if you prefer to include the credit as a line on the customer's next invoice, enter a delayed credit.

A credit memo affects the customer's balance. However, QuickBooks does not apply the credit memo to a particular invoice.

It's important that you review and enable the Automatically Apply Credits setting. To do this:

1. Go to the **Gear** icon.
2. Click **Account and Settings**.
3. Click **Advanced** and then click **Automation**.

The screenshot shows the 'Account and Settings' interface. On the left, a sidebar lists categories: Company, Sales, Expenses, and Advanced. The 'Advanced' category is selected. The main area displays various settings. Under the 'Automation' section, there are four toggle switches: 'Pre-fill forms with previously entered content' (On), 'Automatically apply credits' (On, highlighted with a green arrow), 'Automatically invoice unbilled activity' (Off), and 'Automatically apply bill payments' (On). Below these toggles are 'Cancel' and 'Save' buttons. At the bottom right of the interface is a 'Done' button.

NOTE Select **Automatically Apply Credits** if you want QuickBooks to immediately apply the credit to the oldest outstanding invoice. If you want to be able to apply a specific credit against a specific invoice.

To create the credit memo:

1. Click the **New** menu.
2. Click **Credit memo**.
3. Complete the Credit memo in the same way as you create an invoice.

 To learn how to create and apply credit memos watch this video: <https://youtu.be/L6iwaA9yn94>

- Click **Save** to apply the credit against the outstanding invoice(s) and receive a payment if you choose.

Refund Receipts

When a customer has paid for products and services on a sales receipt in QuickBooks you will use the **Refund receipt** to create a refund transaction.

The refund receipt is similar to the sales receipt. In the case of the refund receipt, you will tell QuickBooks what product or service you're issuing a refund for and add the refund information at the time of the refund.

- Review the original **Sales Receipt** to make sure that you issue a refund for the appropriate products or services.

5. Click **Save**. QuickBooks displays confirmation that the refund was successful.

To learn how to create a refund receipt watch this video: <https://youtu.be/egsnUcl01iQ>

▶ Customer Statements

A customer statement is the status of a customer's account at a particular point in time. Customer statements in QuickBooks don't offer as much detail on each individual sales transaction as an invoice or sales receipt would.

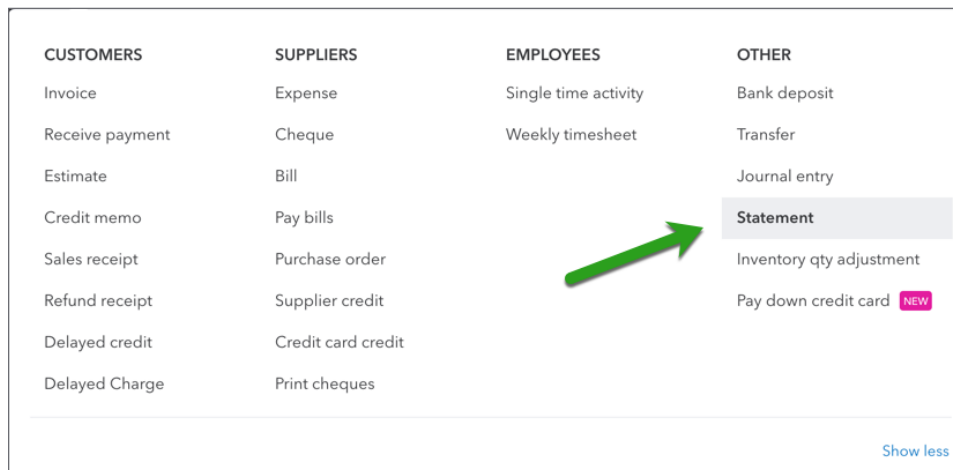

Statements are often sent out on a regular, say monthly, basis to let your customers know where they stand and if they still owe you any money. Each line item on a statement represents sales transactions, credits, and payments for the time period of the statement.

You can create a balance forward, open item, or transaction statement.

- **Balance Forward**—Displays all activity dated between Start and End dates. Will show a Balance Forward amount at the top.
- **Open Item**—Displays all open invoices from a specific date back.
- **Transaction Statement**—Doesn't show a balance, just the amount of transactions and the amount received for each individual transaction.

To create statements for multiple customers:

1. Click the **New** menu.
2. Click **Statement**.

3. Under **Choose statement type** click to select **Balance Forward**, **Open Item**, or **Transaction Statement** depending on your preference.
4. Enter **Statement Date**, **Start Date**, and **End Date**.
5. Set additional statement criteria, if needed.

6. Click **Apply**.

▶ Delayed Charge

When you provide services to customers you may not create an invoice for each service. You may add charges to customers' accounts and invoice for all services in a period of time on one invoice. QuickBooks lets you create a **Delayed Charge** to handle this type of situation. You can create one or more delayed charges and add them to an invoice at a time that you choose.

NOTE Delayed charges are only available in the QuickBooks Online Plus version.

To create a **Delayed Charge**:

1. Click the **New** menu.
2. Click **Delayed Charge**.

- Complete the **Delayed Charge** form just like an invoice form.

▶ Delayed Credit

The delayed credit is like the Delayed Charge. It is a credit that can be applied at a later time. The delayed credit is also a non-posting transaction. This means that it will not post to an account until you apply the credit to a transaction.

To create a Delayed Credit:

1. Click **New**.
2. Click **Delayed Credit**.

▶ Sub-Customers

At times in your business, you may want to track more detail about customers. At times, you may work on different jobs, or projects for customers. QuickBooks lets you track the details of these customer projects using sub-customers. A sub-customer is a name linked to the customer. As you create a sub-customer, QuickBooks will display the name indented below the “parent” customer on the customer centre. To create a sub-customer:

1. On the Customer centre, click **New**.
2. Add the sub-customer information just like you would enter for a regular customer.
3. Click **Is sub-customer**.
4. Choose the parent customer.

▶ Estimates & Quotes

Many small businesses create proposals, quotes, or estimates for projects or jobs for customers. QuickBooks includes an Estimate transaction that lets you create an Estimate for a customer and then copy the estimate to the invoice.

QuickBooks lets you create multiple estimates for any project or job. You can assign a status of **Pending, Accepted** or **Rejected**.

NOTE The Estimate transaction is a non-posting transaction. This means that you can create as many estimates as needed for any customer and it won't affect your accounting until you convert the estimate to an invoice. At this point you record a sale in your business.

Creating an Estimate is similar to the Invoice. It lets you:

- Customize the headings, fields, and columns that appear on your estimates.
- Apply each estimate to a customer or job or apply multiple estimates to a job.
- Start with a blank estimate and enter items already on your Items list, or enter new items as you write. You can also start with a saved estimate (recurring transaction) that is partly filled in. Making an estimate a recurring transaction is useful if your estimates often contain the same information.
- Modify an existing estimate anytime and resubmit it to your customer.
- E-mail the estimate to your customer directly from QuickBooks.
- Convert estimates in a series of progress invoices based on %'s or amounts of the entire estimate or individual lines on the estimate form.

To use estimates in QuickBooks you should review the Company Settings related to Estimates:

1. Click **Gear** icon.
2. Click **Account and Settings** and then click **Sales**.
3. Click the pencil icon next to **Progress Invoicing** to edit.

- Select the checkbox labeled **Create multiple partial invoices from a single estimate**.

Copying Estimates to Invoices

After you've created estimates and delivered the product and services to the customer, you can copy the estimate information directly to the invoice. You can copy the entire estimate at one time or use Progress Invoicing to convert the estimate multiple times. This lets you convert specific percentages or amounts of the estimate or specific amounts of specific lines from the estimate over an extended period of time.

To copy an estimate to an invoice:

1. Click the **New** menu.
2. Click **Invoice**.
3. Choose the customer and then press tab. QuickBooks display the open estimates in the right side of the Invoice window.
4. Click **Add** or **Add all** to the estimates you want to copy across.

The screenshot shows the QuickBooks 'Invoice' window. The main form includes fields for Customer (Cioran's Acorns), Customer email (cioransacorns@example.ca), Billing address, Terms (Net 30), Invoice date (01/11/2019), Due date (01/12/2019), and Location. The balance due is \$0.00. A sidebar on the right titled 'Add to Invoice' shows a filter set to 'All dates' and an 'Add all' button. Below that, an estimate card for 'Estimate #1001' is displayed, dated Nov 1, 2019, with a total of \$26,250.00 (Taxable) for landscaping work. An 'Add' button is highlighted with a green arrow pointing to the first line item in the main table below.

#	PRODUCT/SERVICE	DESCRIPTION	UNIT	RATE	AMOUNT	SALES TAX
1						
2						

Subtotal: \$0.00
Discount percent: \$0.00

NOTE QuickBooks recognizes that you're converting an estimate to an invoice and asks you the question: **How much do you want to invoice?** You have three options:

- **Total of all estimate lines**—This option lets you invoice the entire amount of the estimate and the estimate is closed automatically.
- **% of each line**—This option lets you enter a % to invoice. This will invoice a set percentage of each line on the estimate.
- **Custom amount for each line**—This option lets you enter a \$dollar amount for each line on the estimate.

5. Select the option that works for your situation.
6. Enter the %'s or amounts as needed.

7. Click **Copy to invoice**.

How much do you want to invoice?

Total of all estimate lines = \$25,000.00

50% of each line = \$12,500.00

Custom amount for each line

Copy to invoice

QuickBooks copies that amount to the invoice. Enter any other details as needed on the invoice. Click **Save and close** to save the progress invoice.

Reimbursable Expenses

In some businesses, you may incur expenses that you will be reimbursed by your customers. This is common in many types of services business like law firms, consulting firms, and other service

professionals. Reimbursable expenses vary from business to business; i.e., a lawyer may seek reimbursement for laser copies, postage, delivery, etc.

For billable time: Record the hours spent on the job, using either a weekly timesheet or a single activity entry. Assign the hours to the customer or job (if you're tracking by job). Each entry will automatically be checked in the Billable column on the form.

For job-related purchases (items purchased for a job, subcontracted services): Use a bill, cheque, or credit card charge to record the purchase. On the Items tab, enter each item or service you purchased. In the Customer column, be sure to assign each item or service to the customer or job (if you're tracking by job).

For overhead expenses: Expenses not caused by any specific job (rent, office supplies, etc.) should not be assigned to a Customer:Job. However, you might still want to see these expenses on job costing reports. To do that, create a dummy Customer:Job called "Overhead" and then assign all of your overhead costs to that fake job.

For other expenses (freight charges, postage, etc.): Use a bill, cheque, or credit card charge to record the expenses. On the Expenses tab, enter each expense. In the customer column, be sure to assign each expense to the customer or sub-customer (if you're tracking by sub-customer).

To track reimbursable time and expenses you should review the Company Settings. Click the **Gear** icon and then click **Company Settings**. Click **Expenses**.

Select the option **Make expenses and items billable**.

To track reimbursable expenses and time you can use one or more of the following transaction types:

- Weekly timesheets
- Expenses
- Bills
- Single Time Activity
- Cheques

To track time to a sub-customer:

1. Click the **New** menu.
2. Click **Weekly timesheet**.
3. **Add the employee or supplier name.**
4. Under the Details section choose the sub-customer to track the time.
5. Enter the hours in the appropriate column.
6. Click **Save**.
