Chapter 7
Customers and Sales Part II
In this chapter, you’ll learn how QuickBooks handles advanced features and transactions in the area of sales and customers. In addition to basic sales invoices, sales receipts there are advanced transactions to help you manage sales in QuickBooks

Lesson Objectives

In this chapter, you’ll learn how to:

- Use advanced options on sales transactions
- Credits and Refunds
- Customer Statements
- Delayed Charges & Delayed Credits
- Estimates
- Invoicing & Reimbursable Expenses

Advanced Invoicing Options

There are several options available to you when creating sales invoices. They may be useful in different situation when creating sales invoices for your customers. To access these features, you can enable them in the Company Settings.

1. Click the Gear icon.
2. Click Account and Settings.
3. Click Sales.
Customers and Sales Part II

• **Preferred Invoice terms**—Determines the default terms to be added to customer invoices.

• **Preferred Delivery Method**—The delivery method default determines the way you’ll deliver sales forms to newly-created customers.

• **Shipping**—Adds shipping fields (date, tracking number, destination, subtotal) to sales forms.

• **Custom fields**—Adds extra fields to sales forms. Select “**Internal**” to show the field in QuickBooks; select “**Public**” to show the field on customer forms.

• **Custom Transaction Numbers**—Lets you use your own numbering system. If left blank, invoice numbers are automatically assigned by QuickBooks.

• **Service Date**—Adds a **Service date** field if you need to track the date a service was performed separately from the invoice date.

• **Discount**—Adds a **Discount** field to invoices and other sales forms. In a related setting under Advanced → Chart of Accounts, you can assign what account to track the discount to.

• **Deposit**—Adds a Deposit field to invoices so you can subtract a customer deposit from the total to calculate the balance due.
Now let’s review some of these options in action on the sales invoice. You’ll see several new options in the header of the invoice form. You see the following:

- Terms
- Shipping information
- Sales Rep and Territory (custom fields)
- Invoice Number

In the body of the invoice, you have several options to work with the information in the body section. You can click **Add lines** to add lines for more products and services. Click **Clear All Lines** to clear the section and click **Add subtotal** to add a subtotal to the invoice.
In the footer section of the invoice you can add a **Discount**. You can add a % discount or a flat rate discount. QuickBooks will calculate the amount and adds a line to the footer.

You can also receive a **Deposit** against this invoice. This acts as a payment against the invoice and reduces the amount owing by the amount of the deposit. Since your customer is giving you a deposit, you must tell QuickBooks how you received the payment and what account you’re depositing the funds to. These fields are activated after you enter the **Deposit** amount.
**More Menu**

After you save a transaction you can access more information about the save transaction. After clicking save, QuickBooks adds a *More* menu to the bottom of the saved transaction.

From this menu, you can do the following functions:

- **Copy**—Duplicate the transaction. Copy the transaction if you need to create a duplicate or similar transaction for a customer.
• **Void**—Click **Void** to void the invoice. Clicking **Void** will make the sales invoice a $0.00 transaction while maintaining the history of the invoice number and other details.

- **Delete**—Click **Delete** to remove the transaction from QuickBooks. QuickBooks removes the transaction but keeps a history of the transaction in the Audit log. You can see the transaction history in the **Audit log**.

- **Transaction Journal**—Click the **Transaction journal** to discover the journal entry QuickBooks makes when you save a transaction. The transaction journal includes the debit and credit of the transaction.
• **Audit History**—Click the **Audit History** on the **More** menu to view the history of the transaction.

### Audit History

**History of this transaction:** Invoice No. 1003 ID: 13

**Jan 2, 7:07 pm Central Standard Time:** Added by Hank Norris

**Credit Memos vs. Refund Receipt**

There are times where you’ll be required to issue credit and refunds back to customers for a variety of reasons. These may include faulty products, overcharging, poor service, etc. There are two ways to handle this type of situation in QuickBooks.

1. **Credit memo**—Create a credit memo in QuickBooks if you want to issue a credit and apply the credit against an outstanding or future invoice. If you have created an invoice for the customer you typically issue a credit memo. The workflow will be the following:

   ![Invoice → Credit Memo → Apply Credit Memo](image)

2. **Refund Receipt**—Create a Refund Receipt to refund a customer for a payment they’ve made for products or services. If you have created a Sales Receipt for the customer you typically issue a Refund Receipt. The workflow will be the following:

   ![Sales Receipt → Refund Receipt → Print Cheque (optional)](image)
Credit Memo

You can give a credit memo to immediately post the transaction. Or if you prefer to include the credit as a line on the customer’s next invoice, enter a delayed credit.

A credit memo affects the customer's balance. However, QuickBooks does not apply the credit memo to a particular invoice.

It's important that you review and enable the Automatically Apply Credits setting. To do this:

1. Go to the Gear icon.
2. Click Account and Settings.
3. Click Advanced and then click Automation.

To create the credit memo:

1. Click the New menu.
2. Click Credit memo.
Chapter 7

3. Complete the Credit memo in the same way as you create an invoice.

4. The next step is to apply the Credit memo against an outstanding invoice(s).
   Click New Menu.

5. Click Receive Payments.
6. Enter the Name of customer. QuickBooks displays the Outstanding Transactions and Credits.

7. Select the outstanding invoices to apply the credit against.

8. Select the Credits to apply.
9. QuickBooks applies the amount against the invoice and leaves the difference in the **Amount received**. At this point you can choose to Receive the payment of just apply the credit. If you only choose to apply the credit, make sure that you enter $0.00 in the **Amount received**.

10. Click **Save** to apply the credit against the outstanding invoice(s) and receive a payment if you choose.

**Refund Receipts**

When a customer has paid for products and services on a sales receipt in QuickBooks you will use the **Refund receipt** to create a refund transaction.

The refund receipt is similar to the sales receipt. In the case of the refund receipt, you will tell QuickBooks what product or service you’re issuing a refund for and add the refund information at the time of the refund.
1. Review the original **Sales Receipt** to make sure that you issue a refund for the appropriate products or services.

2. Click **New Menu** then click **Refund receipt**.
3. Complete the **Refund Receipt** as you would a **Sales Receipt**.

   ![Refund Receipt](image)

4. Add the payment information for the refund using the **Payment method**, **Refund From**, and **Cheque** (optional).

5. Click **Save**. QuickBooks displays confirmation that the refund was successful.
Customer Statements

A customer statement is the status of a customer's account at a particular point in time. Customer statements in QuickBooks don’t offer as much detail on each individual sales transaction as an invoice or sales receipt would.

Statements are often sent out on a regular, say monthly, basis to let your customers know where they stand and if they still owe you any money. Each line item on a statement represents sales transactions, credits, and payments for the time period of the statement.

You can create a balance forward, open item, or transaction statement.

- **Balance Forward**—Displays all activity dated between Start and End dates. Will show a Balance Forward amount at the top.
- **Open Item**—Displays all open invoices from a specific date back.
- **Transaction Statement**—Doesn’t show a balance, just the amount of transactions and the amount received for each individual transaction.

To create statements for multiple customers:

1. Click the New menu.
2. Click Statement.
3. Under **Choose statement type** click to select Balance Forward, Open Item, or Transaction Statement depending on your preference.
4. Enter **Statement Date, Start Date, and End Date**.
5. Set additional statement criteria, if needed.
6. Click **Apply**.

7. The **Statements** window displays. Read the instructions at the top, select the appropriate customer(s) and click **Create/Send Selected Statements**. This will send any statements that you’ve chosen to email.

8. To print statements, click Print or Preview (or **Print Statements**) then click **Print**.

9. The preview window will open so you can look at the statements before sending to the printer.
To send a **Transaction Statement** or **Open Item** statement choose the appropriate statement type and then follow the same instruction as above.

### Delayed Charge

A delayed charge is something that you will be creating an invoice for but are not quite ready to create the invoice just yet. You create the charge and it will show up in the **Customers** page but won’t affect their balance. The Delayed Charge is a non-posting transaction in QuickBooks.

You will create charges over a period of time and add those charges to invoices at a later date.

**NOTE** Delayed charges are only available in the QuickBooks Online Plus version.

To create a Delayed Charge:

1. Click the **New** menu.
2. Click **Delayed Charge**.
3. Complete the Delayed Charge form just like an invoice form.

4. Click **Save**.

5. Repeat the process for each additional charge.
You can view the **Delayed Charges** on the Customer centre. Click the **Unbilled Activities** section.

---

**Create Invoices from Delayed Charges**

You can add as many delayed charges as you want over any period. You can transfer one or more delayed charge to an invoice. You can add delayed charges to invoices in two different ways.

---
**Method #1 Customer Centre**

1. Go to the **Customer Centre**.
2. Click **Unbilled Activities**.
3. Click **Start Invoice**. QuickBooks transfers the information from the delayed charge to the invoice.
4. Click **Save**.
Method #2 Invoice

You can also transfer the delayed charge(s) directly from the invoice window.

1. Click **New**.

2. Click **Invoice**.

3. Choose the **Customer** and then click Tab. QuickBooks immediately displays the outstanding **Delayed Charges** on the right-side of the **Invoice** window.

4. Edit the transaction as needed. Click **Save**.
Delayed Credit

The delayed credit is like the Delayed Charge. It is a credit that can be applied at a later time. The delayed credit is also a non-posting transaction. This means that it will not post to an account until you apply the credit to a transaction.

To create a Delayed Credit:

1. Click **New**.
2. Click **Delayed Credit**.
3. Complete the **Delayed Credit** like a **Delayed Charge**.
4. Click **Save**.
Follow the same instructions as above to transfer the delayed credits to the invoice.
**Sub-Customers**

At times in your business, you may want to track more detail about customers. At times, you may work on different jobs, or projects for customers. QuickBooks lets you track the details of these customer projects using sub-customers. A sub-customer is a name linked to the customer. As you create a sub-customer, QuickBooks will display the name indented below the “parent” customer on the customer centre. To create a sub-customer:

1. On the Customer centre, click **New**.
2. Add the sub-customer information just like you would enter for a regular customer.
3. Click **Sub-customer**.
4. Choose the parent customer.

---

**Estimates & Quotes**

An estimate is a description of work you can do or products you can provide for customers. QuickBooks refers to this as creating an estimate, but you can give the form your own title such as bid, grant, or proposal.

Writing an estimate is very similar to writing an invoice. You can:
• Customize the headings, fields, and columns that appear on your estimates.

• Apply each estimate to a customer or job or apply multiple estimates to a job.

• Start with a blank estimate and enter items already on your Items list, or enter new items as you write. You can also start with a saved estimate (recurring transaction) that is partly filled in. Making an estimate a recurring transaction is useful if your estimates often contain the same information.

• Modify an existing estimate anytime and resubmit it to your customer.

• E-mail the estimate to your customer directly from QuickBooks.

• Convert estimates in a series of progress invoices based on %’s or amounts of the entire estimate or individual lines on the estimate form.

To use estimates in QuickBooks you should review the Company Settings related to Estimates:

1. Click Gear icon.

2. Click Account and Settings and then click Sales.

3. Click the pencil icon next to Progress Invoicing to edit.

4. Select the checkbox labeled Create multiple partial invoices from a single estimate.

5. Click Save.
Creating Estimates

You can create estimates in a similar way to invoices. Click the Gear icon and then click Estimates.

1. Enter the **Customer** name.

2. Choose the **Status** of the estimate from the drop-down menu below the customer name.

3. Enter the **Date**.

4. In the body of the estimate add the **Products/services** you’re selling to the customer.
5. Enter the **Description**, **Quantities**, **Amounts** and **Sales Tax**.

6. Click **Save**.

**Reporting on Estimates**

You can view the open estimates on the **Customer** centre. Click **Estimates**.
Run a report on estimates:

1. Click **Reports**.

2. Scroll to **Sales and Customers**.

3. Click **Estimates by Customer**.

**Copying Estimates to Invoices**

After you’ve created estimates and delivered the product and services to the customer, you can copy the estimate information directly to the invoice. You can copy the entire estimate at one time or use Progress Invoicing to convert the estimate multiple times. This lets you convert specific percentages or amounts of the estimate or specific amounts of specific lines from the estimate over an extended period of time.

To copy an estimate to an invoice:

1. Click the **New** menu.

2. Click **Invoice**.

3. Choose the customer and then press tab. QuickBooks display the open estimates in the right side of the Invoice window.
4. Click **Add** or **Add all** to the estimates you want to copy across.

**NOTE** QuickBooks recognizes that you’re converting an estimate to an invoice and asks you the question: **How much do you want to invoice?** You have three options:

- **Total of all estimate lines**—This option lets you invoice the entire amount of the estimate and the estimate is closed automatically.

- **% of each line**—This option lets you enter a % to invoice. This will invoice a set percentage of each line on the estimate.

- **Custom amount for each line**—This option lets you enter a $dollar amount for each line on the estimate.

5. Select the option that works for your situation.

6. Enter the %’s or amounts as needed.
7. **Click Copy to invoice.**

QuickBooks copies that amount to the invoice. Enter any other details as needed on the invoice. Click **Save and close** to save the progress invoice.

---

**Reimbursable Expenses**

In some businesses, you may incur expenses that you will get reimbursed for by your customers. This is common in many types of services business like law firms, consulting firms, and other service professionals. Reimbursable expenses vary from business to business; i.e., a lawyer may seek reimbursement for laser copies, postage, delivery, etc.
For billable time: Record the hours spent on the job, using either a weekly timesheet or a single activity entry. Assign the hours to the customer or job (if you’re tracking by job). Each entry will automatically be checked in the Billable column on the form.

For job-related purchases (items purchased for a job, subcontracted services): Use a bill, cheque, or credit card charge to record the purchase. On the Items tab, enter each item or service you purchased. In the Customer column, be sure to assign each item or service to the customer or job (if you’re tracking by job).

For overhead expenses: Expenses not caused by any specific job (rent, office supplies, etc.) should not be assigned to a Customer:Job. However, you might still want to see these expenses on job costing reports. To do that, create a dummy Customer:Job called “Overhead” and then assign all of your overhead costs to that fake job.

For other expenses (freight charges, postage, etc.): Use a bill, cheque, or credit card charge to record the expenses. On the Expenses tab, enter each expense. In the customer column, be sure to assign each expense to the customer or sub-customer (if you’re tracking by sub-customer).

To track reimbursable time and expenses you should review the Company Settings. Click the Gear icon and then click Company Settings. Click Expenses. Select the option Make expenses and items billable.
NOTE  Use one or more income accounts to track billable expenses. A related setting can be added. Click Advanced and then click Chart of accounts and then choose Billable expenses income account.

To track reimbursable expenses and time you can use one or more of the following transaction types:

- Weekly timesheets
- Single Time Activity
- Expenses
- Cheques
- Bills

To track time to a sub-customer:

1. Click the New menu.
2. Click Weekly timesheet.
3. Add the employee or supplier name.
4. Under the Details section choose the sub-customer to track the time.
5. Enter the hours in the appropriate column.
6. Click Save.
To track expenses to a sub-customer:

1. Click the **New** menu.
2. Click **Expense**.
3. Create the transaction as you normally would.
4. Add the name of the sub-customer to track the expense.
5. Click **Save**.
To track expenses on a cheque to a sub-customer:

1. Click **Create**.
2. Click **Cheque**.
3. Create the transaction as you normally would.
4. Add the name of the **sub-customer** to track the expense on the cheque.
5. Click **Save**.
To track expenses from a bill to a sub-customer:

1. Click **Create**.
2. Click **Cheque**.
3. Create the transaction as you normally would.
4. Add the name of the **sub-customer** to track the expense on the cheque.
5. Click **Save**.

**Transfer Billable Expenses and Time to Customer**

After tracking time and expenses to a customer, you’re now ready to issue an invoice that includes the reimbursable expenses. Create the invoice:

1. Click the **New** menu and then click **Invoice**.
2. Choose the **Customer** and then press tab. QuickBooks displays the reimbursable expenses on the right-side of the QuickBooks window.
3. After completing the invoice as needed, select the reimbursable expenses on the right-side of the window to add them.
